MESSAGE

I am pleased to learn that Indian Oil is organising a Petrochemical Conclave with participation of members from Polyester, Polymers and Detergent Sectors. Indian Oil has been a household name in the Petroleum Sector for the last five decades. With its entry into the Petrochemicals Industry it is poised to scale greater heights.

The Indian Petrochemicals industry comprising of Polyester and Plastics is a high growth industry and is expected to grow manifold in the times to come. Government of India is also placing renewed emphasis on the growth of the manufacturing sector and Indian Oil, through its Petrochemical business is expected to play a significant role in boosting the contribution of petrochemicals to the overall growth of the industry. Also, India is firmly established on the global map as a major Petrochemical production and consumption centre. The industry needs participation of major companies such as Indian Oil to provide the necessary impetus for its growth

Indian Oil's efforts to organise the Petrochemical Conclave is highly appreciable, as this will help in providing the right platform for different stakeholders in the industry to come together and share their experiences and knowledge. This sharing and networking adds to the strengths of the otherwise volatile industry.

I wish the very best to Indian Oil's Petrochemicals Group on their initiative in organising this Conclave. I am confident that their efforts will be successful and this Conclave will become a regular feature of the industry.

(Neelkamal Darbari)
