29th July 2017, Mahatma Mandir, Gandhinagar, Gujarat

Under the aegis of

Ministry of Petroleum
& Natural Gas
Government of India

Coordinated by

IndianOil

Crude to Chemicals

*Mr. David Ayrapetyan
Licensing Manager
ExxonMobil Catalysts & Licensing
Exxon Mobil Corporation*

Synopsis

ExxonMobil developed and commercialized FLEXICOKING™ technology, a continuous resid thermal conversion process with integrated coke gasification, based on Fluid Catalytic Cracking process in 1970's. The FLEXICOKING™ technology can be integrated into the petrochemical complexes to provide feedstock flexibility, optimize hydrogen and energy balance and process the low value bottoms (SC tar, resid, pitches) into a high value products and petrochemical feedstocks.
