

5th IndianOil Petrochemical Conclave 4th February 2016

Financing Petrochemical Projects: Key Issues Fuelling Future Growth & Bankability

Mr. Wijnand Van Eck
Assistant General Manager and Department Head
Global Project Finance Department - Natural Resources
Mizuho Bank Ltd.

Synopsis

Petrochemical projects operate in a cyclical environment coupled with current changing oil market dynamics. Further, given their size, scale and long gestation period makes them one of the more complex and interesting projects to finance.

Mizuho Bank is an active player globally within the Oil & Gas sector. The presentation provides an international perspective to financing of petrochemical projects depicting the key drivers to the Petrochemical project, considerations from bankability perspective (including Key risks & Mitigants), importance of working capital, inter-alia. It also touches upon various financing sources (including highlights of recent Export Credit Agencies involvement in Petrochemical project financing). A brief snapshot of global petrochemical sectoral trends are also captured in the presentation.
